

## Incubators Grow Startups

TechSandBox is the premier incubator for innovation located in Boston's MetroWest region with educational programs, pro bono on-site expertise, co-working space, fab/ prototype lab tools and more.

Close to home, but far from the noise, TechSandBox was founded on the premise that consolidating support is efficient and effective. MetroWest entrepreneurs are part of a unique demographic that needs to be served differently.

We gather a rich array of relevant business experts and hold events that foster those invaluable "random collisions" among residents, the greater community, funding sources, and experts.

Connect.

Learn.

Collaborate.
